

# Down Syndrome Quarterly

## Subscription Form

The aim for the Down Syndrome Quarterly is to provide easy access to research papers and evaluated results for clinicians, professionals and families. The journal will have a broad focus and cover a wide range of topics relating to Down syndrome. It will include relevant research abstracts, commentaries relating the research to practice, peer reviewed research papers, literature reviews, and regional reports. It will include reports and international work, especially encouraging submissions from developing countries. There will be the opportunity to exchange ideas, and discussion papers on key issues will be included.

The small editorial board will ensure that the journal achieves its mandate and goals. An international and widely knowledgeable review board will act as reviewers and commentators. Contact will be developed with regional representatives to encourage participation from all areas.
