

One to One Reading Instruction

Our **reading program** offers one to one instruction for students age 3 to adult. We make learning fun in a supportive learning environment that incorporates individual student interest into a program that is uniquely designed for each student.

This program prepares students to more fully participate in classroom activities at school and complement school based learning through: assessment, program design, material preparation for both in-class and take home, modelling for other members of the student's support team, and charting the course for continued progression.

Because reading is not a linear process, and many students may be working on skills in multiple levels, we have summarized the main skills your student will accomplish under the following levels: (1) Early Foundations, (2) Success Reading, (3) Launch Pad and (4) Read On! Please visit our website for full descriptions of each level.

One to One Reading is offered in weekly individual sessions, at a price of \$61 per session. An optional assessment report is available for \$60.
