

Social Communication and Navigation (SCAN)

Social Communication and Navigation (SCAN) is a two-year program focusing on strengthening communication, social-awareness, self-awareness, and navigation in the community. By strengthening these hard and soft skills, student will be more successful with employment, relationships, and independence in the community. Students will examine social scenarios associated with strangers, co-workers, friends, and family and understand expected and unexpected behaviours.

Community navigation is another area of focus developed using transportation planning tools, smart phones, community signs, and safe street smarts. Learning to solve problems and make decisions related to unexpected events that range from transportation breakdown or errors in route planning to uncomfortable social encounters are emphasized. In addition, the class includes an employment component focusing on interviewing skills and resume development.

The group is taught by an experienced teacher and a program assistant. This program is open to young adults between the ages of 19 and 30. Students should be able to read for information, navigate the web, and take public transportation independently or be working toward this as a realistic goal.

Dates (2020-21)	Schedule	Location	Ages	Class Size	Fee
Sept 8 - Jun 18 (2-week winter break; 1-week spring break)	Tues/Thurs 1:00-3:00 pm	Burnaby (DSRF)	19-30	6	\$2,750 (\$4,500 if combined with Money Math)
